The terms country and nation as used in this report do not in all cases refer to a territorial entity that is a state as understood by international law and practice. The term covers well-defined, geographically self-contained economic areas that may not be states but for which statistical data are maintained on a separate and independent basis.

Positions in this Review are in no way endorsed by Grupo Salinas. Grupo Salinas is pleased to co-sponsor this report to further the debate on issues key to the advancement and competitiveness of Latin America.
